

## Buy now - the new 'Multifunctional Spy Key Ring'

Have you ever been captured whilst spying? Do you run the risk of your enemies discovering you? Are you a spy in need of a helping hand? If so, buy this Multifunctional Spy Key Ring and all your troubles will be left behind.

The Multi-purpose Spy Key Ring is the latest gadget created by Smithers at the Covert Weapons Section of MI6. This is the updated version of the renowned Stun Grenade Key Ring as used by Alex Rider, the spy that even James Bond dreaded. This new version has been fully upgraded to include:

- explosive light burst that will stun but never kill;
- laser light that cuts through all known metals;
- bug finder to check that you are not being spied upon;
- an amazing listening device; plus the latest smoke bomb technology.

Known in the trade as 'The Striker', this little key ring will literally knock out your nemeses! Ideal when faced with imprisonment, but also invaluable for listening in to secret conversations. The inbuilt recording device can hone in and record conversations up to 100 metres away.

A key reason for buying this device is that it looks so harmless and yet it packs a punch. Specially coated in Lithian Diatrex, The Striker cannot be detected by any known device. Travel without a care.

Recommended by 007 himself, it comes complete with a set of keys that can open any known lock. Ideal for those tricky moments when you just cannot enter a forbidden place! Only available through [spygadgetzone.com](http://spygadgetzone.com)

1) Where was this gadget created?
